Dream **Report** – **Version 4.81**

Release Themes

This release is primarily focused on greatly improving the productivity of a report developer, especially when applications require scaling across many pieces of equipment or many sites. This is accomplished through exports and imports of CSV files. These CSV files can easily be edited in Microsoft Excel or other products, leveraging their data incrementing and data fill for mass updates.

Coupled with additional Search and Replace enhancements, Dream Report 4.81 is the most productive solution for Reports, Dashboards and Ad-hoc Analysis and Troubleshooting.

4.81 also offers additional connectivity for Dream Report partner products and includes a great number of smaller SCRs (Software Change Requests. Please see the release notes for details.
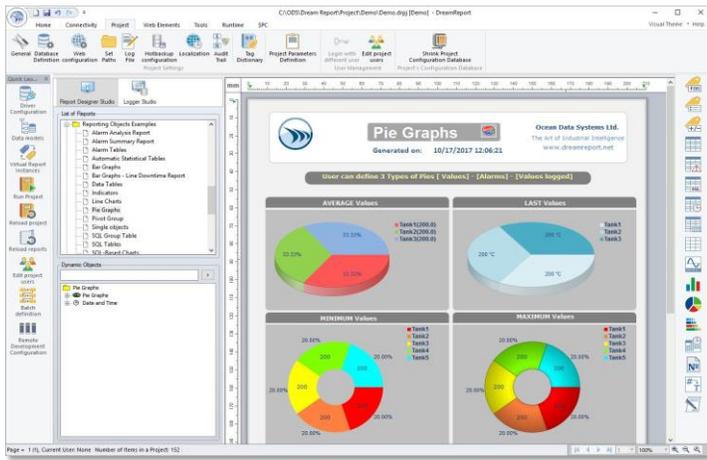

Version 4.81 New Features

A NEW Look – Improved Icons and Color Scheme

CSV Export and Import for IPPs

CSV Export and Import for Virtual Instances

CSV Export and Import for SQL Query Manager

CSV Export and Import for Multi-Tag Aggregations

Search and Replace Enhancements

Official Wonderware Online InSight Solution

Official Citect solution

Many Minor Enhancements – See Release Notes

The Dream Report Value Proposition

The Reports and Information Distribution You Want, Not Just the Ones You Need
Other reporting and information sharing solutions are so difficult to set up and maintain that you only focus on the reports and data dashboards that are absolutely necessary. Dream Report changes the paradigm. With Dream Report, reports and interactive dashboards are so easy, you'll be generating and sharing all the reports you've ever wanted, and that's good for your business. Dream Report - Taming that ocean of data.
