

FOR IMMEDIATE RELEASE

Dream Report Version 4.81 is Available

November 7, 2017 – Ocean Data Systems (ODS), the market leader in reporting and corporate dashboards for the automation industry, announced that version 4.81 is posted and available for download.

Dream Report version 4.81, technically a maintenance release, is available to all 4.8 customers. Along with a broad array of Customer Software Change Requests (SCRs), this release delivers on a theme of Productivity. As customer applications grow and evolve, users benefit from search and replace tools, and export and import functions to replicate reports and dashboards across assets and sites. This release delivers on both fronts with significant enhancements to Search and Replace, and the addition of Exports and Imports to many areas of Dream Report configuration. Other new features include a “Difference” statistic, and enhanced connectivity to Wonderware Online InSight and Citect SCADA, by Schneider Electric.

“In our experience, Dream Report is typically justified through the creation of a half dozen or so reports,” explained Roy Kok, VP Sales and Marketing for Ocean Data Systems. “As our customers continue to leverage the many data sources that Dream Report can support, across similar assets or many sites, we are seeing applications with dozens, and even hundreds of reports in a single Dream Report installation. The payback of Dream Report, even in the smallest of applications is in weeks or months. In larger applications, Dream Report becomes an indispensable tool for compliance, continuous improvement, and data analysis and troubleshooting, for any organization and all applications.”

About Ocean Data Systems

Founded in 2004, Ocean Data Systems develops software solutions for industrial compliance and performance; reports, dashboards and ad-hoc analysis and troubleshooting. The product, Dream Report, is the leading “purpose built” solution for industry and the “Internet of Things (IOT).” Dream Report delivers both local and Internet connectivity to all major HMI/SCADA, Historian and business data sources through either proprietary or industry standard drivers. Dream Report’s markets include process, hybrid and discrete; with special functionality for Life Sciences (Pharmaceutical and Biotech), Water, Wastewater, Heat Treat, Building Automation, Energy Management and Manufacturing Operations. www.DreamReport.net
