

Yearly Energy Efficiency Report

Report Generated 23/03/2012

All member states in Europe are required to meet the Energy Performance of Buildings Directive. The directive (EPBD Directive 2002/91/EC) became law on 4th January 2003 and had to be implemented by January 2006. Article 7 of the directive requires that whenever a building is constructed, sold or rented out, a certificate detailing its energy performance must be made available.

An Energy Performance certificate provides details of how energy efficient a property is by giving it a grading on a scale A-G, with A being the most energy efficient. As well as the Energy Efficiency grading a property is also given an Environmental Impact rating again on a scale of A-G with a property rated A having no impact on the environment.

These ratings are shown in a table similar to those supplied with electrical appliances such as fridges and washing machines.

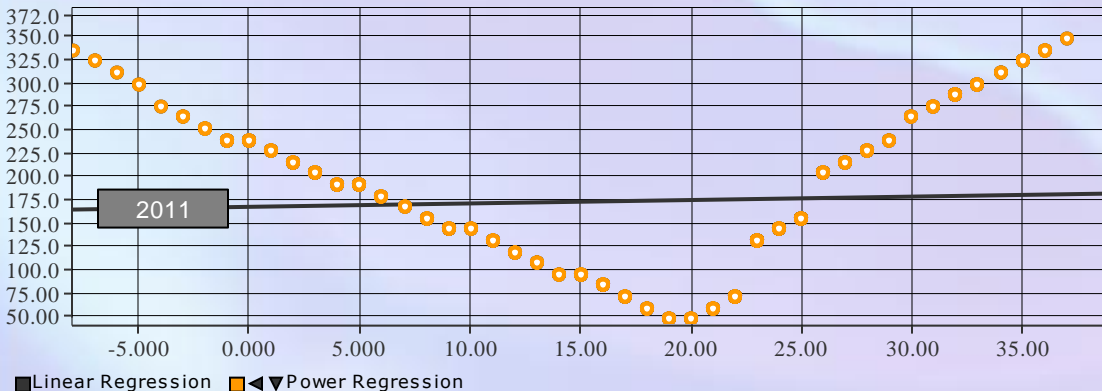

Energy Management

This energy report is based on consumption and use from:

- Electrical Distribution Systems
- Energy Producing Systems
- Building Envelope
- HVAC Systems
- Lighting
- Motor and Drives
- Other energy-consuming equipment

Energetic Signature

Energy Efficiency Class	2 611.4 kW
A (0-25)	
B (26-50)	B (26-50)
C (51-75)	
D (76-100)	
E (101-125)	
F (126-150)	
G (Over 150)	
EPBD Directive 2002/91/EC	32.9

CO2 Efficiency Rating	7 834.2 CO2
A (93-100)	
B (81-92)	
C (66-80)	
D (51-65)	
E (36-50)	
F (21-35)	
G (1-20)	G (1-20)
EPBD Directive 2002/91/EC	3.3
