

FOR IMMEDIATE RELEASE

RACO Joins Dream Report Proven Partner Program

November 22, 2016 – Ocean Data Systems (ODS), the market leader in reporting and corporate dashboards for the automation industry, announced that RACO has joined the [Dream Report Proven Partner Program](#) and is recommending Dream Report as their solution for custom reports and dashboards.

RACO is a leading supplier of remote monitoring systems for critical assets via traditional landlines or IIoT. RACO offers a hosted data solution, AlarmAgent.com, which centralizes data in the cloud and provides secure access to that data through an online Web Portal. Dream Report is a significant component of that Web Portal. RACO has refreshed existing reports, as well as created new reports that will improve its customer's ability to quickly understand and identify problems in their remotely monitored critical assets.

"We have worked closely with RACO, especially in the area of security and integration, to deliver a seamless solution for their customers," explained Roy Kok, VP Sales and Marketing for Ocean Data Systems. "RACO has developed a cloud-based data repository for information relayed from their RTUs. Dream Report has been integrated with that solution and provides a Web Based set of views and statistics for RACO customers."

"We evaluated a variety of solutions from toolkits and custom internal developments, to other third-party products and were extremely pleased with the standard functionality and flexibility delivered with Dream Report. This is a product that has been purpose built for our industry," explained James Brown, Vice President of Sales and Marketing for RACO. "We are looking forward to the new value we can deliver to our customers based on our Dream Report foundation."

About Ocean Data Systems

Founded in 2004, Ocean Data Systems develops software solutions for industrial compliance and performance; reports, dashboards and ad-hoc analysis and troubleshooting. The product, Dream Report, is the leading "purpose built" solution for industry and the "Internet of Things (IOT)." Dream Report delivers both local and Internet connectivity to all major HMI/SCADA, Historian and business data sources through either proprietary or industry standard drivers. Dream Report's markets include process, hybrid and discrete; with special functionality for Life Sciences (Pharmaceutical and Biotech), Water, Wastewater, Heat Treat, Building Automation, Energy Management and Manufacturing Operations. www.DreamReport.net

About RACO Manufacturing and Engineering Co.

Since 1948, RACO Manufacturing and Engineering Co. of Emeryville, California has provided state-of-the-art remote monitoring systems for municipality, industry and government remote critical assets.
