--- 3 Types of Bar Calculations - Values; Alarms; Logged Values Counter---

Bar Graph enables you to divide a period into several segments (time-periods) to visualize and compare the content of each (example: break a week into days and compare each day of the week)

Bar options enables you to display Classical Bar, Single Column Bar, and Pareto Bar

Note: this shows a Bar Graph set with a "no color" (transparent) background, placed on top of an image, and then grouped together.

Pareto Bar

Result is automatically sorted and displayed from the highest to the lowest
