FOR IMMEDIATE RELEASE

# New Dream Report Software Release

## Industrial Enterprise Ready with Multi-User Development

May 9, 2017 – Ocean Data Systems (ODS), the market leader in automated reporting and corporate dashboards for industry, announced the release of Dream Report version 4.8. Multi-user and concurrent development now makes Dream Report the ideal solution for the industrial enterprise.

Dream Report continues to expand its target market, adding large corporate installations to the mix. These environments require one or more Dream Report servers with the ability to support remote and concurrent development. By default, a Dream Report server will now support a local or remote developer. Additional development CALs are available to facilitate multiple concurrent developers complete with check-out and check-in functionality, version management and audit trails. Additional enhancements include NEW support for Wonderware Online InSight, enhanced GE SmartSignal and GE Historian Drivers, enhanced Alarm Filters improve ISA 18.2 reporting, and numerous other enhancements improve flexibility and usability.

“Dream Report is all we do and Dream Report receives major enhancements with each release,” says Roy Kok, VP Sales and Marketing of Ocean Data Systems. “Connectivity is a clear differentiator in our product and each release delivers additional connectivity. However, this release was primarily focused on the support for large applications with concurrent development requirements. Dream Report addresses this additional market segment quite well, without adding complexity to the small applications market.”

### About Ocean Data Systems

Founded in 2004, Ocean Data Systems develops software solutions for industrial compliance and performance; reports, dashboards and analysis tools. The product, Dream Report, is the leading “purpose built” solution to address onsite applications and address statistics and analytics for the “Internet of Things (IOT).” Dream Report delivers both local and Internet connectivity to all major HMI/SCADA, Historian and business data sources through either proprietary or industry standard drivers. Dream Report’s markets include process, hybrid and discrete; with special functionality for Life Sciences (Pharmaceutical and Biotech), Water, Wastewater, Heat Treat, Building Automation, Energy Management and Manufacturing Operations.
