

FOR IMMEDIATE RELEASE

Schneider Electric Delivers Dream Report for CitectHistorian Available Soon

February 8, 2016, LYON, France – Ocean Data Systems (ODS), the market leader in automated reporting and corporate dashboards for the automation industry, announced that Schneider Electric™ will be delivering Dream Report™ for CitectHistorian™ as a branded solution for plant reporting.

Working closely with Schneider Electric, Ocean Data Systems has delivered Dream Report for the upcoming version of the best-in-class, real-time plant historian software, Citect Historian 2016 (v4.60). This release includes both new and improved drivers for CitectHistorian, and will be licensed, sold, delivered and supported by Schneider Electric and its subsidiaries, globally.

“We have looked at the success of Dream Report in our other divisions and it is clear that this is an excellent product that would add significant value to every CitectHistorian installation,” explained Con Karantziounis, CitectHistorian Product Manager at Schneider Electric. “We are cementing our efforts towards promoting simplification and ease-of-use, with a user-friendly and programming-free automated reporting and data analysis solution, and we encourage all our CitectHistorian customers to consider Dream Report as an extension to their systems.” Availability is planned for March 2016.

“We are very proud to have Schneider Electric choose Dream Report as the reporting and analysis solution for CitectHistorian” says Alex Mazal, President of Ocean Data Systems. “This opens a significant new market for Dream Report, one that was poorly served with generic business tools in the past. Schneider Electric already offers Dream Report through its Wonderware™, Indusoft™, and Eurotherm™ channels and it makes perfect sense that Dream Report should also become the default solution for their CitectHistorian customers.”

About Ocean Data Systems

Founded in 2004, Ocean Data Systems develops software solutions for industrial compliance and performance; reports, dashboards and analysis tools. The product, Dream Report, is the leading “purpose built” solution for industry and the “Internet of Things (IOT).” Dream Report delivers both local and Internet connectivity to all major HMI/SCADA, Historian and business data sources through either proprietary or industry standard drivers. Dream Report’s markets include process, hybrid and discrete; with special functionality for Life Sciences (Pharmaceutical and Biotech), Water, Wastewater, Heat Treat, Building Automation, Energy Management and Manufacturing Operations. www.DreamReport.net
