
Allied Solutions Strengthens Its Digital Transformation Portfolio with Exclusive Distribution of Dream Report and Dream IT Across Asia

Singapore — June 2026

Allied Solutions, one of Asia's leading providers of industrial automation and digital transformation solutions, is pleased to announce a new strategic partnership with Ocean Data Systems (ODS), the developer of the internationally recognized Dream Report and Dream IT software platforms.

Under the agreement, Allied Solutions becomes the exclusive distributor of Dream Report and Dream IT across Singapore, Malaysia, Vietnam, Indonesia and China, further strengthening its ability to deliver comprehensive digitalization solutions to industrial customers throughout the region.

As manufacturers continue their Industry 4.0 and Smart Factory initiatives, organizations are seeking better ways to transform operational data into actionable business intelligence. By adding Dream Report and Dream IT to its portfolio, Allied Solutions now offers customers a powerful suite of technologies for industrial reporting, analytics, KPI monitoring, operational intelligence, and data-driven decision making.

For more than 25 years, Allied Solutions has helped industrial organizations improve performance through automation technologies, industrial software, cybersecurity, networking, and digital transformation services. The addition of Dream Report and Dream IT further expands the company's ability to support customers throughout every stage of their digitalization journey—from data acquisition and connectivity to reporting, analytics, and business insight.

"At Allied Solutions, our mission is to help customers unlock greater value from their operational data and technology investments," said Koh Ching Peh, a sales manager of Allied Solutions. "Dream Report and Dream IT are highly respected solutions that perfectly complement our existing offerings. We are excited to bring these technologies to customers across the region and help them accelerate their digital transformation initiatives."

Dream Report is widely recognized as one of the industry's leading reporting and analytics platforms for industrial environments, enabling users to create automated reports, dashboards, and performance analytics without complex programming. Dream IT extends these capabilities by providing advanced industrial intelligence tools that help organizations gain deeper visibility into operations and make faster, better-informed decisions.

For Ocean Data Systems, the partnership represents an opportunity to work with one of Asia's most established industrial technology providers.

"We are proud to partner with Allied Solutions and support their continued growth across Asia," said Alex Mazal, the CEO of Ocean Data Systems. "Their strong technical expertise, deep understanding of industrial markets, and long-standing customer relationships make them an ideal partner for expanding the reach of Dream Report and Dream IT throughout the region."

The collaboration reflects a shared commitment by both companies to help industrial organizations modernize operations, improve efficiency, and leverage data as a strategic asset. Customers throughout Singapore, Malaysia, Vietnam, Indonesia and China will benefit from local sales, engineering support, implementation services, training, and consulting delivered by Allied Solutions' experienced regional teams.

By combining Allied Solutions' extensive industrial automation expertise with the proven capabilities of Dream Report and Dream IT, the partnership creates a powerful platform for supporting the next generation of smart manufacturing and industrial digitalization initiatives across Asia.
